FEBRUARY 3rd 5:30 pm

PRESIDENTS MESSAGE

Well gang we made it into the New Year. We have a lot of fun and educational opportunities in store for us. Rob Boyer started the year off with a great presentation on segmenting techniques. I now have a greater appreciation of the work that goes into segmentation. Great job Rob!

Our demonstrator at the February meeting will be Keith Gotschall from Salida, Colorado. I have it on good authority that his demo in Loveland was awesome. Here's a link to his website for a preview <http://keithgotschall.com/home>. There are several demos he does and Kay has left the decision of which one up to him. It will be a surprise.

Scott Longberry will be the instructor for our first Bemis class of the year. The class 'the lathe as a design tool.' We've schedule our classes for the Saturdays after our meetings. This allows us to get set up for the class the night before. It makes for less work and confusion the morning of the class. As always, if you can hang around and help set up, we would greatly appreciate it.

We are still looking for volunteers for class mentors.

Do you have some nice turnings laying around your shop, collecting dust, just because you don't have anywhere to show them off? Have we got a deal for you and it won't cost you a penny. Robert is coordinating setup up of a woodturning display at the Penrose Library. They have several locked display cases they've offered to us for the month of March. You can either bring items to the February meeting or we will setup a drop off point and location later in the month.

Richard Raffan is going to stop by Colorado on his way to Kansas City for the AAW Symposium in June. Richard is already scheduled to give an all-day demo for the Rocky Mountain Woodturners club in Loveland on Saturday June 17th, and he has offered to give an all-day demo in Denver on Sunday June 18th. The price for the demo will be dependent on the number of attendees. Think about it and if interested we will get a tentative head count to pass along to Pat Scott, President of the Front Range Woodturners, who will be hosting the event.

Steve's doing a great job with our chapter web site. If you're interested in the lineup for the rest of the year, check out the events page <http://ppwoodturners.org/club-events/>.

Have you been wondering who that person sitting next to you is. Too bashful to introduce yourself? We've got a solution for that.

Milo Scott, a chapter member, is making some great laser etched wood name badges. They have the chapter Logos, chapter and your name on them. They use a magnetic catch so you don't have to poke holes in your clothing. He will make them to order for \$10.00 apiece. A portion of the proceeds will come back to the chapter's kitty.

Don't forget the Presidents Challenge. The challenge was to turn something with using some form of segmentation. The winners of the 2017 President's Challenge Participation Award were Dotty and Wayne Hume who received a year membership as their co-prize.

See you all at the next meeting on Friday, February 3rd, until then be safe and keep on turning.

Vic

February Demonstration: Keith Gotschall

Bowl Turning Kieth Style

Here is a statement from Kieth's web site:

I am a Craftsman. That statement says a lot for me. Yes, I am an artist too, but on the most familiar scale I am a craftsman. I make furniture. I wood turn both functional and decorative items. I teach wood turning. I sculpt both wood and stone. My intent as the maker is important to me. I try to bring this focus, this same feeling and set of skills to everything I do throughout the day. I make things well, with a thought toward good design and pleasing use. I try to make things that will last, that will have a life of their own after I am gone. Sometimes whimsical, often practical, but always honest.

Make sure to go to Keith's web site listed below to get a better idea as to who Kieth is and what he does.
